New treatment modalities of NETs
K. Öberg, Sweden

Neuroendocrine tumors (NETs) of the gastrointestinal tract have acquired increased attention due to recently improved recognition and establishment of new methods of treatment. This Symposium will cover the latest important aspects of NETs, their epidemiology, signalling pathways, and molecular genetics, and in addition focus on progress in diagnosis, and newer surgical and medical treatment strategies for the various NET entities. The Symposium is planned to be an interactive educational session with several well recognized speakers in different fields.

Welcome,

*Göran Åkerström, Professor, University Hospital, Uppsala, Sweden, President, IAES
Kjell Öberg, Professor, Chairman Centre of Endocrine Tumors, University Hospital,
Uppsala, Sweden*
